MATTE BLACK

A bold, dark matte finish

Matte Black makes a statement in your space, cultivating a sophisticated palette and coordinating flawlessly with most other fixtures and accents. With bright tones, Matte Black is undeniably modern with a strong contrast, but it can complement traditional or transitional spaces just as well when paired against warm neutrals for a rustic feel akin to cast iron.

MODERN PLAY ROOM

"Matte Black is a tireless finish that adds an element of grace and sophistication. The finish is easily paired with both traditional and contemporary accessories, fixtures and backdrops which naturally positions a Matte Black fixture as the focal point of a room." – Lisa Canning

BLACK STAINLESS

A dark, muted silver finish with deep, moody hues and a subtle warmth.

Black Stainless sets a kitchen apart from the crowd with sophisticated contrast. Less reflected and warmer than traditional stainless steel, black stainless offers a modern look that easily pairs with black stainless appliances as well as a variety of finishes in the kitchen.

THE LADY LAURIER

"A faucet and its finish can really bring a space together, adding so much character and interest, that it really should be an important consideration right from the get go! I loved the black stainless faucet I chose for our kitchen renovation because it tied in the other black and chrome finishes perfectly, achieving the right balance. It is subtle and yet so dramatic at the same time." – Kristina Eustace, Inspired by Lynne
